REGIONAL FULFILLMENT PARTNERSHIP PROPOSAL

Harbor & Pine Supply Co. (fictional sample company)

1. Executive Summary

Harbor & Pine Supply Co. proposes a regional fulfillment partnership that consolidates inbound freight, shortens delivery times, and gives the client a single point of accountability for order handling.

Based on the order volumes shared during discovery, we expect average delivery time to fall from 4.1 days to under 2 days within four quarters, while reducing split shipments and customer service contacts.

2. Background and Objectives

The client currently ships from three separate warehouses, each with its own cut-off times and carrier contracts. This creates inconsistent delivery promises and makes exceptions difficult to trace.

The objectives of this proposal are to: unify order cut-off times, consolidate carrier management, and provide weekly performance reporting.

3. Proposed Solution

We will operate a single regional hub with same-day pick and pack for orders received before 2 p.m. Inventory will be synchronized with the client's storefront every 15 minutes.

Exceptions such as damaged goods, address errors, and stock-outs will be logged in a shared tracker with an owner and a resolution deadline.

4. Implementation Timeline

The rollout is divided into four phases so that service continues without interruption.

Phase	Scope	Duration
1. Discovery	Volume audit, SKU mapping	2 weeks
2. Setup	Hub configuration, storefront sync	3 weeks
3. Pilot	20% of orders routed to hub	4 weeks
4. Full rollout	All orders, weekly reporting	Ongoing

5. Pricing

Pricing is per order and includes pick, pack, standard packaging, and carrier label generation.

Service	Unit	Price
Pick and pack	per order	$1.80
Additional item	per item	$0.35
Storage	per pallet / month	$18.00
Returns handling	per return	$2.50

6. Next Steps

Upon approval, we will schedule a kickoff meeting within five business days and share a detailed migration checklist.
